### Producer Margin

The Producer Margin is adjusted once every six Quota Periods to include changes in the costs of production except for feed and chick costs. The procedure is as follows:

- Use 1990 Cost of Production (COP) as base; update prices using Statistics Canada data.
- Compare average prices of recent six Quota Periods to average of previous six Quota Periods and apply difference to Producer Margin in previous six Quota Periods.
- Current Producer Margin 44.94 ¢/kg; previous Producer Margin 44.31 ¢/kg; change 0.63 ¢/kg.

*Provided that it is duly declared in force by The Ontario Farm Products Marketing Commission under the Farm Products Marketing Act, the Board and the licensed Ontario Processors are projecting that the minimum Live Price for chicken for Quota Period A-97 will be \$1.391 per kilogram.*
